

LIM 2 CONTROLLER

natural aluminium, 230V, incl. installation housing

The LIM 2 four-channel controller allows you to set and call up light colours or lighting levels at the touch of a button. Four groups of lights with digital operating devices for a control voltage of 1-10V (e.g. fluorescent lamps, LV halogen or LED applications) can be controlled. Four sequential programs are already pre-programmed in the system. Four other programs each of eight lighting scenes can be freely programmed. Dynamic sequences of the set lighting scenes are possible due to the selectable level and fading times. Other features are a panic switch, external switch output, variable time intervals, and much more. A convenient system which does not need any detailed system knowledge and can also be used by laymen without any problems.

TECHNICAL DATA

Item no.:	470531
Primary nominal voltage	220-240V ~50/60Hz ma/V
Width	11.7 cm
Height	3.7 cm
Depth	9.7 cm
Net weight	0.433 kg
Gross weight	0.501 kg
IP Code	IP 20
Safety class	II
Color	aluminium
